# Aqua4D® Water-Smart Swiss Efficiency

## Game-changing solutions for optimized irrigation

Charles-Henri FAURE  
Chief Technical Officer

SWISS TECHNOLOGY 

Aqua4D® powered by © Planet Horizons Technologies SA - All Rights Reserved

There is no food without agriculture, and there is no agriculture without water

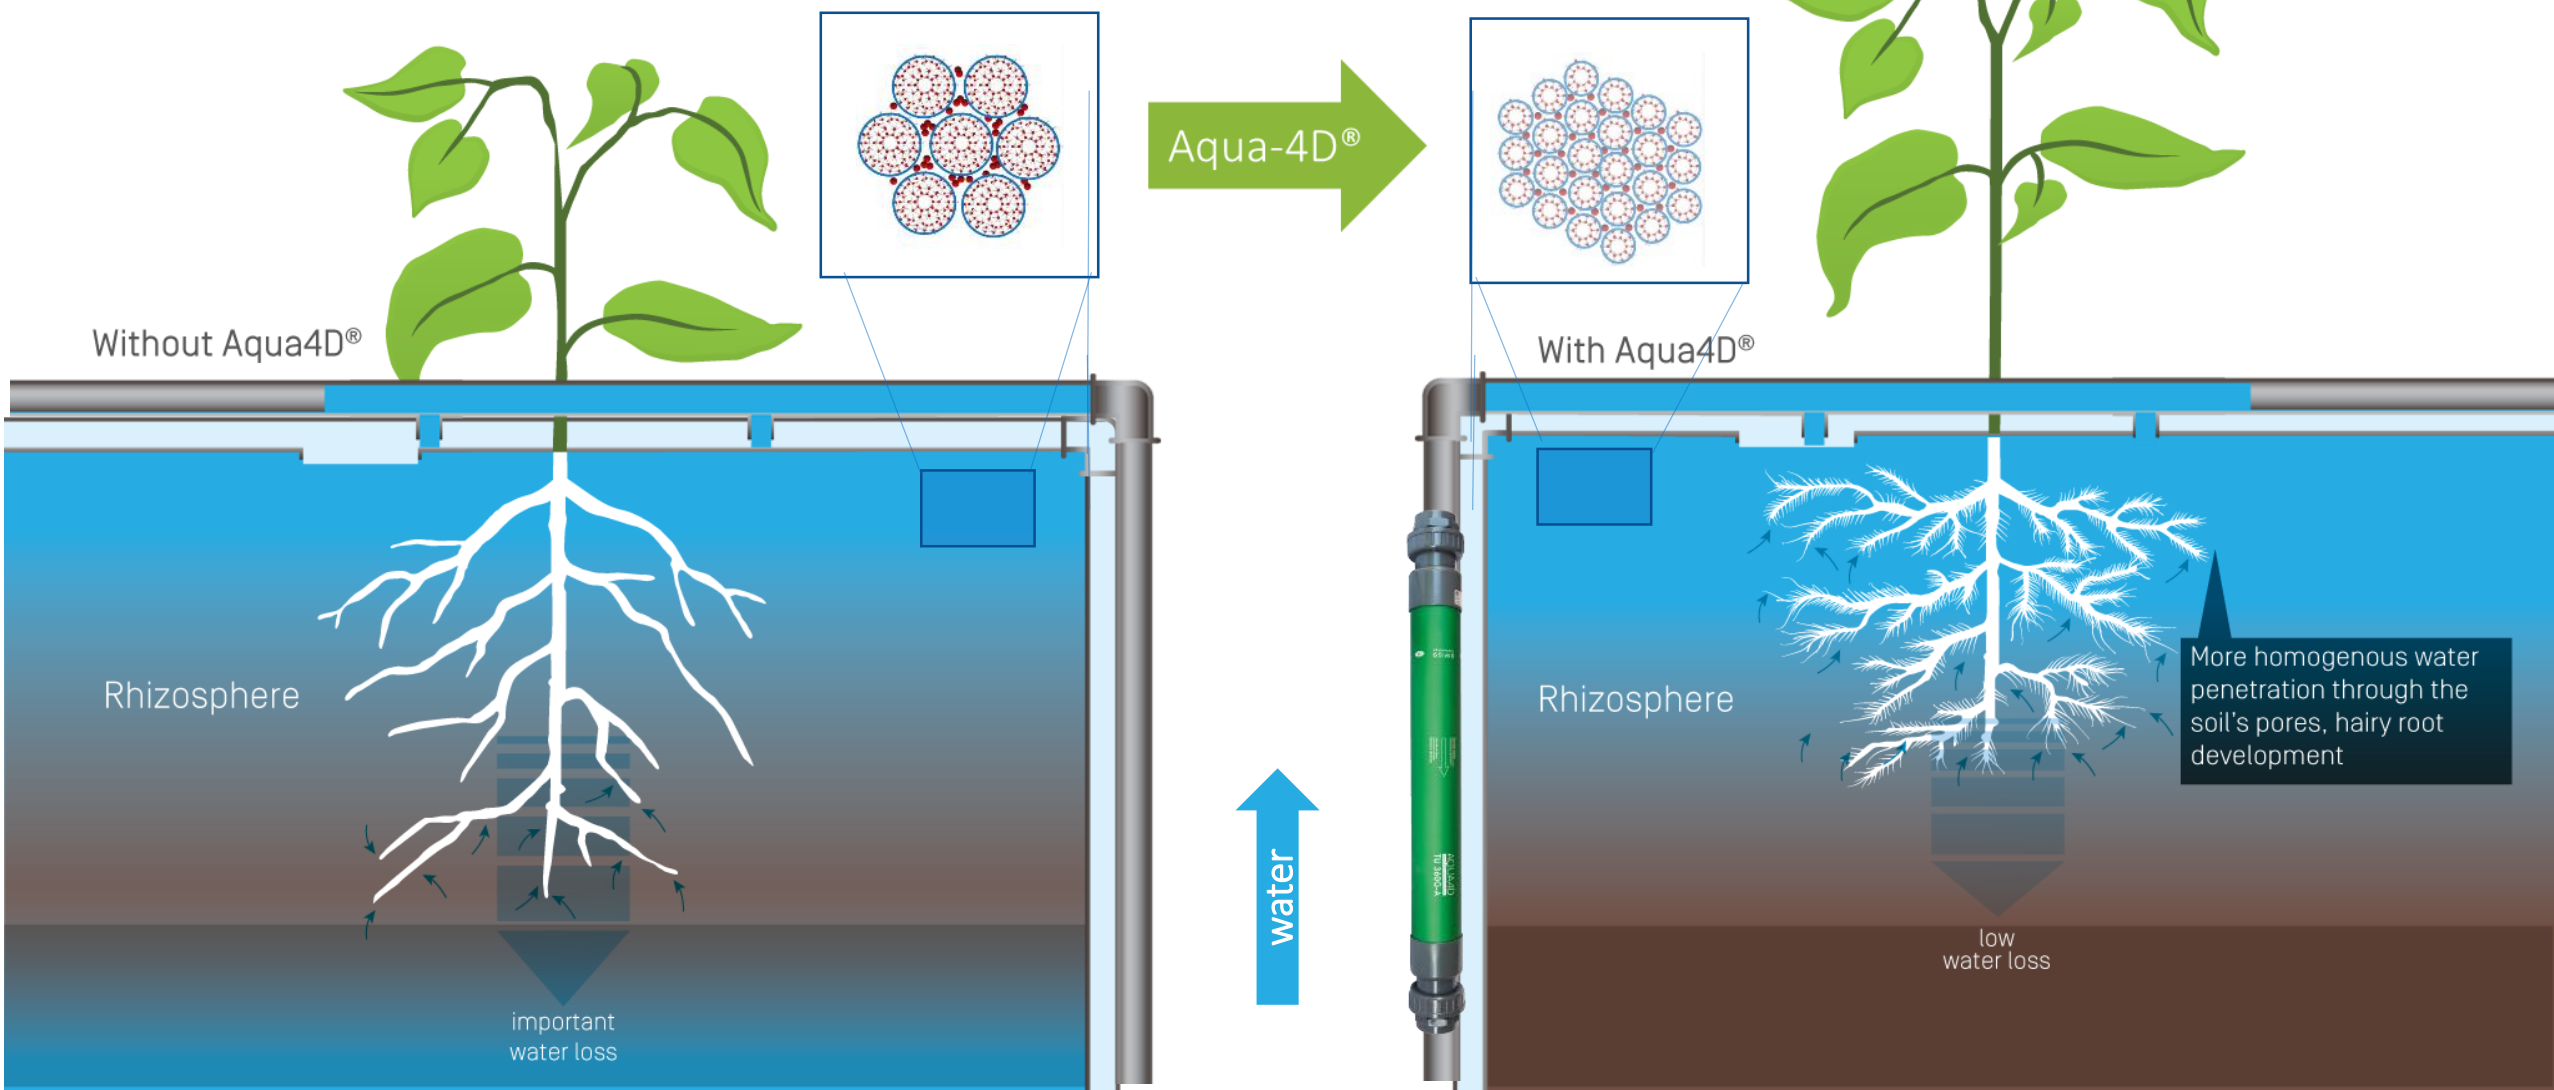

**Worldwide major challenge with water scarcity and food protection**

**Aqua4D allows to do more (production) with less (water, nutrients, chemicals)**

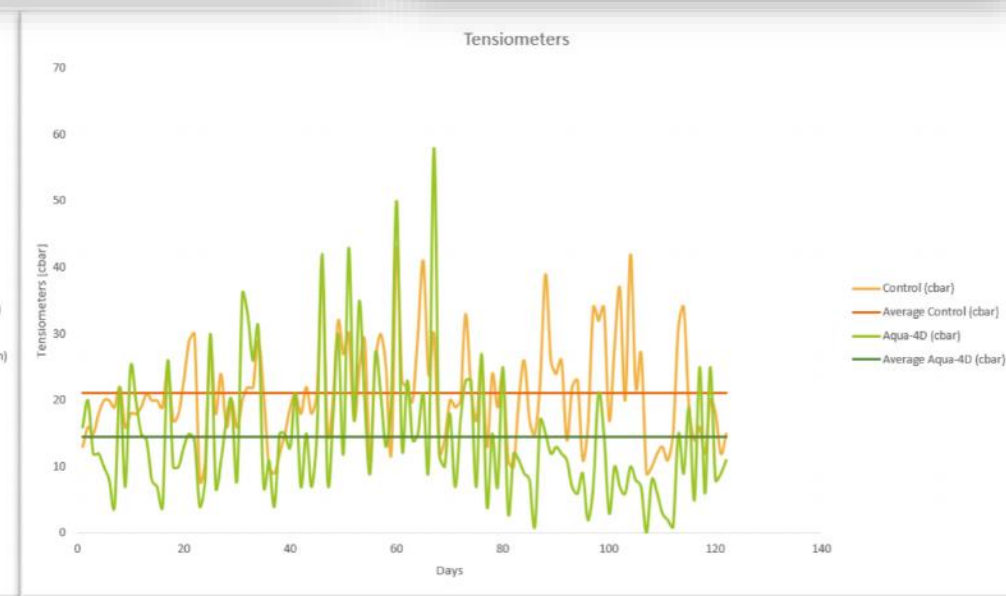

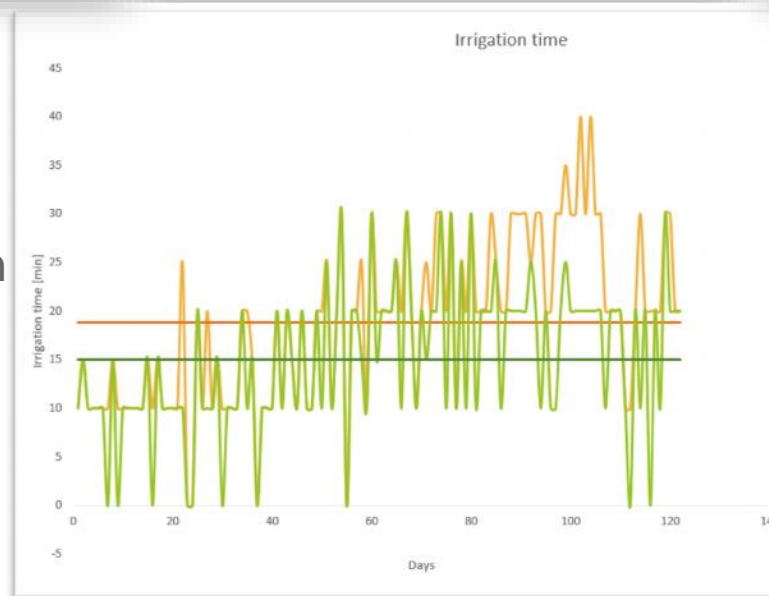

# Solution: Improve water penetration & retention of irrigation water

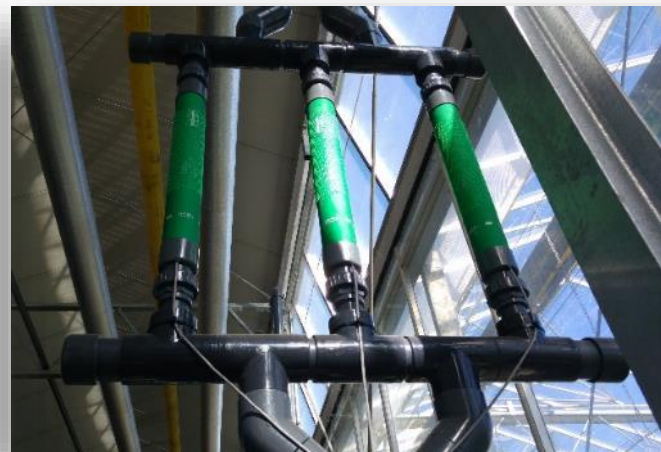

Soil was  
**31% more moist**  
and the grower was then  
able to make  
**20% water savings**  
by less frequent crop  
irrigations

Aqua4D contributes with 11 of the 17 sustainability goals set by the United Nations

**WE ARE DOING MORE WITH LESS**

**LESS**
